

Community-led support. Integrated action.

Who we are

Multi Integrated Support (MIS) is an Ethiopian national civil society organization working with disadvantaged mothers, children and hard-to-reach communities.

Our purpose

MIS works to improve access to health and education services, support income generation and improve the natural environment through an integrated and participatory community-based approach.

Current initiative

With the Institute for Global Outreach (IGO), MIS implements an Integrated Child Protection and Development Initiative in Kolfe Keranyo, Addis Ababa, from November 2025 to November 2028. The August 2026 record identifies 229 children and approximately 916 indirect family and community beneficiaries.

Documented experience

MIS reached 8,307 people in 1,500 households through its December 2022-March 2023 Metekel non-food-item response with IOM / Rapid Response Fund. Urban Destitute Support contracts covered 101 direct beneficiaries: 24 mothers, 48 accompanying children and 29 street children. The Nexus-supported Fenote Selam project recorded 150 direct participants and 2,000 indirect beneficiaries.

Partnership and accountability

MIS brings experience in child protection, education, nutrition, livelihoods, humanitarian response and civil-society inclusion. This public overview summarizes verified website content; it is not an annual report or audited financial statement. Program figures have different definitions and should not be added together.
